HEDIS® Tips:
Follow-Up After Emergency Department Visit for Alcohol and Other Drug Abuse or Dependence (FUA)

MEASURE DESCRIPTION

The percentage of emergency department (ED) visits for patients 13 years of age and older with a principal diagnosis of alcohol or other drug (AOD) abuse or dependence, who had a follow up visit for AOD. Two rates are reported:

1. The percentage of ED visits for which the patient received follow-up within 30 days of the ED visit (31 total days).
2. The percentage of ED visits for which the patient received follow-up within 7 days of the ED visit (8 total days).

CODES INCLUDED IN THE CURRENT HEDIS MEASURE

Codes to Identify AOD Abuse or Dependence

Description	Codes

HOW TO IMPROVE HEDIS SCORES

- ☐ Schedule a follow-up visit within 7 days and at least two additional visits within 30 days, or refer immediately to a PCP or behavioral health provider when giving a diagnosis of alcohol or other drug dependence. Telephone and/or telehealth appointments within the required timeframe meets compliance.
- ☐ Refer the member to a Molina Care Manager or work collaboratively with the Molina Care Manager if one is already assigned to help increase member's access and motivation for treatment.
- ☐ Follow-up visits must be supported by a claim, encounter or note from the mental health practitioner's medical chart in order to count toward the measure.
- ☐ Document identified substance abuse in the patient chart and submit a claim with the correct billing codes.
- ☐ Review situations where there are comorbid medical conditions. Be sure to include all diagnoses and use substance use related codes (ex. Cellulitis- L03.90 related to Intravenous Drug use F11.20) as these also qualify patients for the measures.
- ☐ Provide patient educational materials and resources that include information on the treatment processes and options, including mutual support groups and other community-based programs.
